

Komfovent Flex

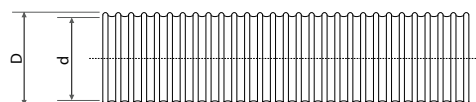

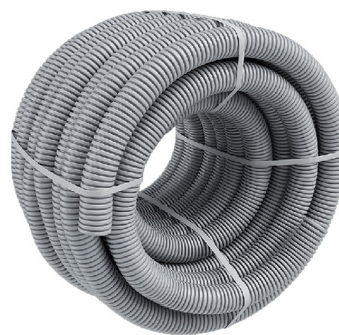

Flexible duct

Komfovent Flex 75 AS AB / Komfovent Flex 90 AS AB

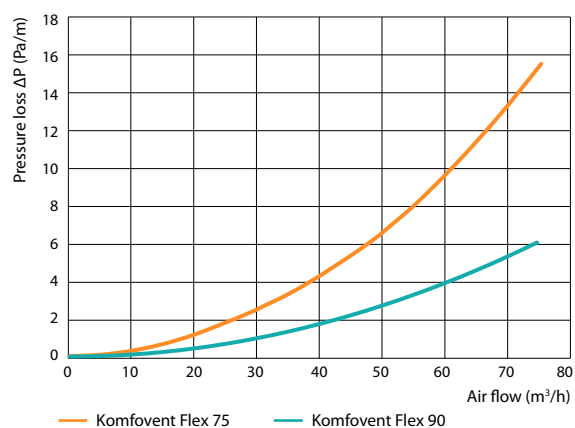

Flexible duct is suitable to use for inlet and outlet air. Flexible ducts are made from high density polyethylene (PE) to ensure strength and mechanically resistant. Double layer minimize pressure losses.

Where flexible ducts and other components are connected, it is highly recommended to use sealing rings. For manufacturing flexible ducts, antistatic and antibacterial additions are used.

Price per meter. 50 m per pack.

Pressure loss dependence on air.
