

LINEO 600/75 PROFILE

FLUSH-MOUNTED LINEAR DIFFUSER

Flush-mounted linear ventilation diffusers are designed for installation in plasterboard ceilings and walls. Once installed, the diffusers are plastered and painted the same colour as the ceiling or wall, leaving only a minimal visible slit that becomes an interior design element.

LINEO 600/75 PROFILE diffusers are designed for flexible plastic duct systems with a 75 mm diameter. They can be mounted vertically or horizontally and feature a compact design, requiring only 17 cm of installation space.

LINEO 600/75 PROFILE VERTICAL diffusers are also designed for flexible plastic duct systems with a 75 mm diameter. They can be mounted vertically or horizontally and require only 17 cm of installation space.

The connection box and diffuser base are made of PVC, while the grille is powder-coated black, and the duct connections are made from antistatic PP plastic.

The balancing damper position is adjusted using a measuring tool included in the package.

LINEO 600/75 PROFILE diffuser comes with a connection box and two 75 mm duct connections.

LINEO 600/75 PROFILE VERTICAL diffuser comes with a connection box and two 75 mm duct connections.

Model	Number of slots	Length, mm	Weight with/without packaging, kg	Code
