

## SCR

### WALL MOUNTED, SENSORY CO<sub>2</sub>, HUMIDITY AND TEMPERATURE SENSOR-CONTROLLER

AQ ventilation intensity control option depends on the external sensor signal. Provides ventilation intensity correction according to the increased CO<sub>2</sub>, humidity level, etc. A different AQ function may be set depending on the sensor type, therefore, the intensity of the unit will be regulated accordingly. User can activate this function anytime according to the demand and can also observe the premise's air quality on the panel. This function is possible for all the units with EC fans just by connecting one of the sensors listed below.
