

## SSF, SSFN

### Reducer

SSF-B×H-b×h-L-V galvanized steel.

SSFN-B×H-b×h-L-V stainless steel.

To diagnose asymmetry V, to reducer must look from side B × H, where B > b.

For product toughness and connections flanges are used.

when  $B \leq 1500$  mm  $F = 20$  mm

when  $1500 \text{ mm} < B \leq 2000$  mm  $F = 30$  mm

when  $B > 2000$  mm  $F = 40$  mm

Standard length

when  $B, H \leq 350$   $L = 300$  mm

when  $350 < B, H \leq 700$   $L = 450$  mm

when  $B, H > 700$   $L = 600$  mm

B – width, mm (100-2000).

H – height, mm (100-2000).
